`Node.js` `Typescript` `SQL` `Vue` `Git` `Linux` `Nginx` `Docker` `Microservices`

My name is Vlad. I am a JavaScript Fullstack Developer.

English: C1
GitHub: Vishota

Passionate about programming since childhood, I have developed numerous pet projects while continuously refining my technical skills. Focus on building high-performance web applications, scalable Node.js microservices, and interactive graphics (Cocos, Pixi.js, Three.js). Fast learner with a strong academic background (GPA 9.41/10), ready to deliver value to a production team.
Feel free to contact! Telegram: @vishota

My typical project stack

Node.JS	*back end microservices*
PostgreSQL	*database*
Vue	*front end microservices*
NGINX	*proxying traffic + caching, securing*
Docker	*containerization*
Linux	*OS*

Career Track

MRAID Development

Feb 2024 - Sep 2025

Developed Playable Ads:
- Cocos Creator
- Pixi.js
- Three.js

Worked on Dashboard service:
- Optimized Playable Ads build sizes and loading speeds to meet strict ad network requirements
