Node.js **Typescript** **SQL** **Vue** **Nuxt** **Git** **Linux** **Nginx** **Docker**

Express | JWT | WebGPU | Microservices | Vite | Event loop | Multithreading | CSS & Preprocessors

REST API | Patterns | npm modules development | CORS | SSH | FTP | SSL | External APIs | Figma

Security | Cryptography | Reliability | Testing | Design principles | numerous npm libs & frameworks

Communication with client | **Training** | **Leadership** | **Determination** | **Critical & Systemic thinking** | **Continuous self-development** | **Responsibility**

My name is Vlad. I am a JavaScript Fullstack Developer, aiming to become a Tech Lead. Continuously self-improving, ready to help and train, wishing to lead and guide.

I have a lot of commercial & non-commercial experience developing precise, reliable, supportable and complex systems using JS stack.

Graduated from BSUIR.

I'd be happy to work in the team of determinated, smart, multifaceted people.

Passionate about programming since childhood, developed numerous pet projects, simultaneously working on my skills.

Feel free to contact! Telegram: @vishota.

Typical stack

Node.JS	*back end microservices*
PostgreSQL	*database*
Vue	*front end microservices*
NGINX	*proxying traffic + caching, securing*
Docker	*containerization*
Linux	*OS*
